Insert 'is' in the last box after 'find'

5 Select appropriate results	M	Evidence from the student of the keywords used and the best results of their searches	Students are able to recognise relevant and irrelevant information/links from the results of their searches. They reject the irrelevant information and keep information which is connected to answering their search questions. They should also demonstrate their understanding that not all the information they find is accurate and trustworthy.
------------------------------	---	---	---

Page 59

Third paragraph from bottom and second line from bottom of paragraph should be iTunes not Itunes

of databases. Similarly, they could be using a database such as iTunes to store their music and audio files. Which databases have been easier to use, and what has made some databases harder to use?

Page 65

Third paragraph from bottom and fourth line from bottom of paragraph should read:

should be aware that the higher the quality of the image, the longer it will take to upload, and they should begin to balance the size and quality of the elements of their web pages. They could either collect images from the Internet, or select from a range provided by you. Students do not need to create the images themselves.

The third column and third cell of the table should now read: (saved to CD-ROM, floppy disk or USB flash drive)

3 Produce video or animation with appropriate software	P	Final video or animation (saved to CD-ROM, floppy disk or USB flash drive)	Video: students need to be able to make informed decisions to remove certain pieces of footage, and to order the clips according to their plan. Animation: students should be able to use appropriate software to amend and alter the picture for different frames of the animation. The animation should include at least five frames. The software can be used to produce middle movements (for example, tweening), but the students must have manually created at least three of the frames themselves by editing their original picture.
